

Ameer Mazin

Junior Backend Developer

Professional Summary

Motivated Junior Backend Developer with strong foundation in Python and a growing skill set in .NET Core and C#. Experienced in building APIs with FastAPI, Flask, and Django, and passionate about scalable backend systems and distributed architectures. Currently learning containerization tools like Docker and orchestration tools like Kubernetes, with a goal to grow into microservices and cloud environments. Actively seeking a challenging backend role to contribute and continue growing in a high-performing team.
